GENERAL CONTRACTING

# ABOUT US

Green Oasis General Contracting Company celebrates over 40 year's of combined experience in delivering high quality infrastructure and service initiatives across multiple fields of civil engineering. Best known for its consistency in delivering on Quality, Schedule and Budget, Green Oasis Contracting is recognized through its projects and clients as a leading Civil Engineering partner synonymous with reliability and commitment.

Building sustainable performance through our unwavering focus on health, safety and the environment is central to how we continue to build our business and develop talent. Our Quality Management Certificates and OHSAS Certifications in Health & Safety Management Systems is indicative of the professional protocols foundational to our continued growth and partnerships.

## OUR Mission

Partner across the region in building the future through the delivery of environmentally responsible structural and infrastructure projects that delivers technical excellence, enduring functionality and quality.

## OUR Values

● SAFETY    ● INTEGRITY    ● ACCOUNTABILITY

# OUR SERVICES

## CIVIL Works

Leading large-scale construction projects is what we do best including the full spectrum of construction engineering sectors including civil, mechanical, electrical and instrumentation.

## INFRASTRUCTURE Works

Infrastructure that is intelligently, sustainably, and purposefully developed lays the foundation for prosperity, economic growth, and well-being. Green Oasis is proud to deliver infrastructure solutions across the United Arab Emirates, managing the engineering, project management, procurement, and construction.

## ELECTROMECHANICAL Works

Our in-house team of qualified engineers produced our design with our technical expertise and experience, and our well-trained technician and project teams implemented and carried out the design.

## **WATER** Projects

Specializing in transmission and distribution Infrastructure networks we offer services in maintenance, interconnections, pipeline protection, and metering. Our Teams will ensure reliable and efficient operations delivered against strict standards to provide solutions tailored to the needs of modern infrastructure.

## **POWER** Projects

Leveraging decades of expertise in civil construction our extensive power project portfolio across the region is distinguished through quality, safety, and progress standards.

## **EQUIPMENT & LOGISTICS** Works

In-house transportation and material handling, whether human or mechanical, are managed by a strong team and are performed to some degree in practically every business.

# OUR PROJECTS

Understanding our clients' needs and bringing that to life is the cornerstone to each of our projects. Whether big or small our passion is in delivering high quality projects on time to budget.

# HEALTH & SAFETY

In compliance with the legislative regulations outlined in ISO 14001:2015 and OHSAS 18001:2007, we have maintained an efficient HSE management system.

We are committed to implement Health, Safety & Environment policies that adhere to all legal criteria at every work level and are overseen by a group of top-notch professionals. For every project we work on, we adhere to strict HSE standards and strive for a Zero-Accident-Zero Incident goal.
